NEW PARISH PROTOCOLS

1. Based on guidance from the CDC, masks are no longer required for vaccinated people in the State of Massachusetts. The State does advise non-vaccinated people to continue to wear masks. Some people will continue to wear masks, including some who have been vaccinated. Let us all respect the choices that people make.

2. People who are fully vaccinated do not have to socially distance when they come to church.

3. Parish staff and volunteers will not be monitoring anyone or asking people whether they've been vaccinated, but we ask people to monitor themselves and make their own decisions about masks and social distancing.

4. If you see someone wearing a mask in church, please assume that he or she wishes to socially distance and give them appropriate space.

5. The ribbons that are blocking every other pew will remain in place for the near future, for the sake of those who wish to socially distance.

6. Priests and Eucharistic ministers will wear masks when they distribute Holy Communion. Parishioners are asked to receive Communion in the hand. Those who wish to receive Communion on the tongue, please come to the priest at the end of the line.

7. The congregation can resume singing. The Parish will provide either worship aids or hymnals to facilitate this.

8. Offertory collections will resume, and ushers and/or greeters will bring the collection baskets from pew to pew. Ushers and/or greeters will wear masks when taking up the collection.

9. Registering in advance to attend Mass is no longer necessary.

10. **The dispensation from the obligation to attend Mass will be lifted on this weekend (June 19/20).** However, if you are not feeling well, please stay home. The 10:00 Sunday Mass will continue to be livestreamed from the Parish website at **www.medfordcollaborative.org**

SHE GAVE ME MY LIFE BACK

Local clinic has a modern, medical solution to treat your **Peripheral Neuropathy** and is seeing incredible results!

"It started out as a normal outing. My wife and I had to run to the grocery store. We were driving down the road casually going over our shopping list when the car ahead of me started to slow down anticipating the yellow light. I started to move my foot from the gas to the brake as any normal person would do when they see brake lights in front of them but I couldn't. I couldn't feel my foot. The car kept moving forward and I just couldn't get my foot on the brake. And CRUNCH! I finally came to a stop when I hit the car in front of me."

This tragic story was shared with us by Dan S. a Burlington resident who has peripheral neuropathy. And while no one was hurt in this accident, Dan S. had suffered almost everyday of his life with tingling and burning in his feet until numbness set it and he could no longer feel even the brake pedal beneath his foot.

"The first stage is pain." shares Acupuncturist Min Jeon of AWC|Acupuncture & Wellness Clinic. "You feel burning, tingling, sharp pains, or you feel like you're walking on tacks or marbles. This pain eventually subsides and the numbness sets in. Unfortunately, the numbness brings with it a whole other host of problems."

This was the case with Dan. "I said I wasn't going to drive again. What if that had been a pedestrian?"

It is terribly common that peripheral neuropathy and its debilitating symptoms interfere with a person's ability to live their life. Dan was now reliant on his wife to drive him around, even the simple pleasure of cruising down Route 1 or taking her out to dinner was outside his capabilities. And even more common, Dan's general practitioner and several specialists told him there was nothing they could do other than prescribe him pills that would ease the pain of his neuropathy.

That's where Acupuncturist Min and her staff at AWC come in. "About 75% of our current patients come to us suffering from the same condition as Mr. Dan," tells Min Jeon Lic.Ac. "They're in constant pain from neuropathy and it prevents them from not only living their lives but more importantly, it prevents them from enjoying it. Depending on the severity of their nerve damage, we typically see tremendous progress in 3-4 months of treatment. I like to say we're in the business of making your golden years golden."

"I can't lie," confides Dan. "I was skeptical at first. The folks down at Mass General told me there was nothing that could be done and then there's a Acupuncturist right here in Burlington tells me she can help. Turns out she was right! About three months after treatment I was able to confidently drive myself to my appointments! My wife and I celebrated by buying ourselves a new car! It's hard to put into words how incredible this is, quite frankly Acupuncturist Min Jeon gave me my life back."

While AWC specializes in acupuncture and it's definitely part of their protocols in treating neuropathy, the real secret is in a more modern medical solution called ATP Resonance BioTherapy™. "This technology was originally developed by NASA to expedite healing and recovery" shares Maureen, a Senior Patient Care Technician at the clinic. "It's like watering a plant. ATP Resonance BioTherapy™ stimulates the blood vessels to grow back around the peripheral nerve and provide them the proper nutrients to heal and repair."

You can learn more about Acupuncturist Min and AWC by visiting AWClinic.com. If you're ready to schedule a consultation call (781)221-0162 and do so quickly. AWC is a very intimate clinic and the staff takes pride in their ability to take their time with each patient so they are very limited in their ability to take on new patients.

Visit www.AWClinic.com to learn more and to take advantage of their New Patient Offer!
